

Seward Highway/ 92nd Avenue Grade Separation

FACT SHEET

Purpose of Project

The Seward Highway: 92nd Avenue Grade Separation Design Services project includes design and construction of a half-diamond interchange at 92nd Avenue. The interchange will raise the Seward Highway on a bridge crossing over 92nd Avenue, and include ramps to and from the south to allow vehicles to exit from and merge into Seward Highway traffic.

The project will extend 92nd Avenue from Vanguard Drive on the east to Old Seward Highway on the west. Currently, the 92nd Avenue alignment is called Academy Drive on the segment east of the Seward Highway, and Abbott Road on the segment west of the Seward Highway.

92nd Avenue will cross Homer Drive (west frontage road, to be constructed as part of this project) and Brayton Drive (east frontage road in place today). 92nd Avenue between Vanguard and Brayton (east frontage) and between Old Seward Highway and Homer Drive (west frontage) is proposed to be three lanes with a sidewalk and multiuse pathway. Between the frontage roads, 92nd Avenue is proposed to be four lanes, with a through-lane in each direction and side-by-side left-turn lanes.

The Homer Drive frontage road will be developed from Dimond Boulevard south, past the 92nd Avenue connection, providing access to 92nd Avenue and southbound Seward Highway.

When completed, the project will provide access between the Old Seward Highway/Dimond Boulevard commercial district and south Anchorage residential and commercial areas east of Seward Highway. It is a state-funded, stand-alone project that was part of the larger Seward Highway, Rabbit Creek Road to 36th Avenue, project.

Project schedule

Preliminary Design	May 2008 - March 2009
Final Design	March 2009 - September 2010
Right of way	December 2009 - October 2010
Construction	2011 - 2012

How can you help?

We need to know your concerns about and ideas for this project. Please fill out the written comment sheet, and sign up for e-mail updates.
