

**Fairview Loop Rehabilitation  
Project No. 51774**

---

**Open House Comment Sheet**

Thank you for coming to tonight’s meeting. Our goal is to develop plans to enhance vehicular and pedestrian safety along Fairview Loop and extend the service life of the road. We would like you to answer the following questions as you move from station to station tonight.

**Traffic & Safety:** Does this overview of crashes between 1998-2007 match your observations? Where are your greatest safety concerns and why?

---

---

---

---

**Pedestrian Safety and Trails.** The Alaska Legislature recently appropriated \$4.5 million dollars for 2.5 miles of pedestrian pathway along Fairview Loop. The Knik/Fairview Community Council has long advocated for a pedestrian pathway to be located near Snowshoe Elementary School. Are there other areas along the route that the project team should study? What is your vision of the pedestrian trail? On which side of the road should the pathway be located?

---

---

---

---

---

---

---

---

**Intersections.** There are many intersections along the 11-mile Fairview Loop corridor. Are there specific intersections that we should pay careful attention to? Why?

---

---

---

---

**Traffic Speeds.** Are there locations along Fairview Loop where speeds seem excessive? Please list and or annotate on one of the maps.
