

# Fairview Loop Rehabilitation

## Project No. 51774

### Project Scope

The State of Alaska Department of Transportation and Public Facilities (DOT&PF) continues design efforts for a project to rehabilitate Fairview Loop Road from its connection with Parks Highway on the east to its connection with Knik-Goose Bay Road on the west. The 11-mile project will result in a rehabilitated road surface, the same two 11-foot lanes, possibly wider shoulders, and/or minor realignment depending on motor vehicle crash history. The design includes a separate multi-use pathway, the full length of the road but how much gets constructed depends on available funds.

The project is State funded with \$22 million in general obligation bonds approved by the voters in November 2008. In 2010, the Legislature appropriated an additional \$4.5 million dollars to add 2.5 miles of paved, multi-purpose trail to the project scope. If the geometry and right of way needs exceed the budget, the project scope for the road will be reduced to stay within the funds appropriated. The pathway funds will be used to begin the multi-use pathway with a section near Snowshoe Elementary School.

If the geometry and right of way needs exceed the budget, the project scope for the road will be reduced to stay within the funds appropriated. The pathway funds will be used to begin the multi-use pathway with a section near Snowshoe Elementary School.

### Current Status

The survey, traffic safety and some environmental fieldwork have been completed. Environmental field studies are underway as needed for permitting the project. The design work continues. Following the March 1<sup>st</sup>, 2011 meeting, preliminary designs will be available online at the project website:

<http://brooks-alaska.com/fairviewloop/documents/htm>

In addition to design and environmental permitting underway, the team continues to reach out to the public. An important part of any project is to inform those most affected by the project and seek their local knowledge and insight. The input leads to a better design. **Public comment and input will be accepted throughout the design process.** So let us know if you want to receive information about the project. You can do this in several ways:

- 1) Send an email to the public participation coordinator or
- 2) Log onto [www.brooks-alaska.com](http://www.brooks-alaska.com) and sign up to receive email on the project by entering your email in the "Join a B&A Project List" (see example)
- 3) Check the project Web site for updates at: <http://brooks-alaska.com/fairviewloop/>
- 4) Call on of the project team members listed below and request to be added to contact lists.
