

Glenn Highway MP 34-42 Projects

FACT SHEET

Project Scope

The Glenn Highway Milepost (MP) 34-42 Reconstruction Project, Parks Highway to Old Glenn Highway, has been split into three projects. The first is the main reconstruction project that consists of two lanes in each direction, frontage road, and left/right turn lanes. The second project will construct a pathway from Matanuska Lakes State Recreation Area to Arctic Avenue. The third project realigns the Colleen Street intersection and extends a frontage road.

1) Glenn Highway MP 34-42 Reconstruction

Project No. 0A15024/Z581040000

This reconstruction project will add lanes, widen shoulders, add turn lanes and frontage roads, and add other traffic and safety related improvements. The final roadway will be a four-lane divided highway.

The project is currently in the right-of-way appraisal and acquisition phase. The design phase of this project will continue and drawings are being developed to refine impacts to the affected environment, properties, and utilities. The project team is available to work with adjacent property owners on design refinements.

2) Parks Highway to Old Glenn Highway Pathway

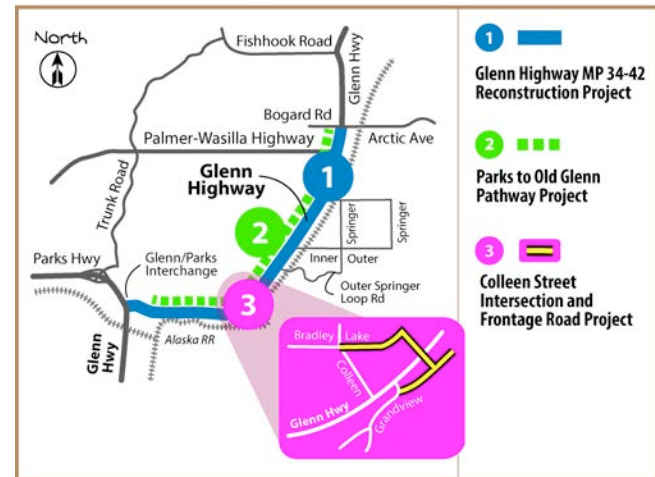

Project No. 0A15032/CFHWY00029

This pathway project will construct a 10-foot-wide separated pathway along the north side of the Glenn Highway from the Matanuska Lakes State Recreation Area and extending into Palmer. The environmental document is currently being prepared, with the final design anticipated to start in 2016.

3) Colleen Street Intersection and Frontage Road

Project No. 0A15033/CFHWY00006

This project will realign Colleen Street and Grandview Road to a new signalized median opening on the Glenn Highway. It will also extend Grandview Road along the east side of the railroad tracks to consolidate access. The environmental document is currently being prepared, with the right-of-way appraisal and acquisition phase and final design anticipated to start in Summer 2016.

Construction Schedule

Construction for all three projects — 2018 to 2019 (depending on availability of funding and other factors)
