

# Glenn Highway MP 34-42 Projects

**Glenn Highway MP 34-42 Reconstruction**, Project Number OA15024/Z581040000

**Parks Highway to Old Glenn Highway Pathway**, Project Number OA15032/CFHWY00029

**Colleen Street Intersection and Frontage Road**, Project Number OA15033/CFHWY00006

## FACT SHEET

### PROJECTS MAP

#### Project Scope

The Glenn Highway Milepost (MP) 34-42 Reconstruction Project, Parks Highway to Old Glenn Highway, has been split into three projects and two phases as described below:

#### 1) **Glenn Highway MP 34-42 Reconstruction**

This reconstruction project will add lanes, widen shoulders, add turn lanes and frontage roads, and add other traffic and safety related improvements. The final roadway will be a four-lane divided highway. Construction will be completed in two phases: Phase 1 – Glenn Highway: South Inner Springer Loop to West Arctic Avenue; Phase 2 – Parks Highway to South Inner Springer Loop.

**Current Status:** The Phase 1 construction began in July 2018. The 2018 work consisted of clearing, grubbing, removal of structures, and utility relocations. In 2019, the additional lanes and other major changes will be constructed. The design phase of Phase 2 will continue and drawings are being developed to refine impacts to the affected environment, properties, and utilities. Phase 2 right-of-way appraisal and acquisition phase is continuing, and the project team continues to work with adjacent property owners on design refinements.

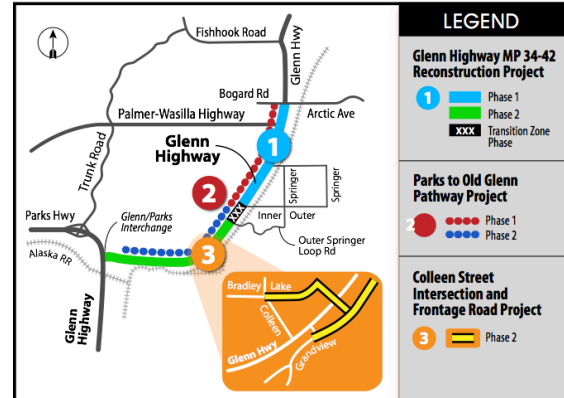

#### 2) **Parks Highway to Old Glenn Highway Pathway**

This pathway project will construct a 10-foot-wide separated pathway along the north side of the Glenn Highway from the Matanuska Lakes State Recreation Area and extending into Palmer. The pathway will be constructed in phases as noted above.

**Current Status:** The Phase 1 pathway construction began in 2018 and will continue in 2019. The final design is underway on Phase 2.

#### 3) **Colleen Street Intersection and Frontage Road**

The scope of this project includes a traffic signal on the Glenn Highway to connect South Colleen Street and East Bradley Lake Avenue to the Glenn

Highway and East Grandview Road, and the extension of East Grandview Road along the east side of the railroad tracks to serve as a frontage road. A railroad siding is also planned between Outer Springer Loop and the fair grounds. These improvements will be included in Phase 2 construction.

**Current Status:** The final design is underway. The project is in right-of-way appraisal and acquisition phase.

#### Construction Schedule

Phase 1 construction began in 2018 and will continue in 2019. Phase 2 is slated to begin in 2020, however, construction start depends on availability of funding and other factors such as completing acquisition of the necessary right-of-way.

#### For more information

Contact the Glenn Highway MP 34-42 project team members with questions, concerns, comments, or compliments any time. You can also visit the website [www.brooks-alaska.com/glennhighway](http://www.brooks-alaska.com/glennhighway).
